Table 19b.	Use of various alcoholic beverages during the last 30 days by gender. 2019 (percentages)	42
Table 20a.	'When was the last day you drank alcohol?'. 2019 (percentages)	43
Table 20b.	'When was the last day you drank alcohol?' by gender. 2019 (percentages)	44
Table 21a.	Beer quantities among students reporting any last day alcohol consumption. 2019 (percentages)	45
Table 21b.	Beer quantities among students reporting any last day alcohol consumption by gender. 2019 (percentages)	46
Table 22a.	Cider quantities among students reporting any last day alcohol consumption. 2019 (percentages)	47
Table 22b.	Cider quantities among students reporting any last day alcohol consumption by gender. 2019 (percentages)	48
Table 23a.	Premixed drinks quantities among students reporting any last day alcohol consumption. 2019 (percentages)	49
Table 23b.	Premixed drinks quantities among students reporting any last day alcohol consumption by gender. 2019 (percentages)	50
Table 24a.	Wine quantities among students reporting any last day alcohol consumption. 2019 (percentages)	51
Table 24b.	Wine quantities among students reporting any last day alcohol consumption by gender. 2019 (percentages)	52
Table 25a.	Spirits quantities among students reporting any last day alcohol consumption. 2019 (percentages)	53
Table 25b.	Spirits quantities among students reporting any last day alcohol consumption by gender. 2019 (percentages)	54
Table 26a.	Estimated average alcohol consumption (centilitres of 100 % alcohol) during the last alcohol drinking day among students reporting any last day alcohol consumption, per beverage and total. 2019	55
Table 26b.	Estimated average alcohol consumption (centilitres of 100 % alcohol) during the last alcohol drinking day among students reporting any last day alcohol consumption, per beverage and total. Boys. 2019	56
Table 26c.	Estimated average alcohol consumption (centilitres of 100 % alcohol) during the last alcohol drinking day among students reporting any last day alcohol consumption, per beverage and total (a). Girls. 2019	57
Table 27.	Total estimated average alcohol consumption (centilitres of 100 % alcohol) during the last alcohol drinking day among all students including non-drinking students. 2019	58
Table 28.	Self-estimated level of intoxication during the last alcohol drinking day by gender. 2019	59
Table 29a.	Frequency of having had five or more drinks on one occasion during the last 30 days. 2019 (percentages)	60
Table 29b.	Frequency of having had five or more drinks on one occasion during the last 30 days by gender. 2019 (percentages)	61
Table 30a.	Frequency of lifetime drunkenness. 2019 (percentages)	62

Table 30b.	Frequency of lifetime drunkenness by gender. 2019 (percentages)	63
Table 31a.	Frequency of being drunk during the last 12 months. 2019 (percentages)	64
Table 31b.	Frequency of being drunk during the last 12 months by gender. 2019 (percentages)	65
Table 32a.	Frequency of being drunk during the last 30 days. 2019 (percentages)	66
Table 32b.	Frequency of being drunk during the last 30 days by gender. 2019 (percentages)	67
Table 33a.	Proportion of students having drunk (at least one glass) and having been drunk at the age of 13 or younger. 2019 (percentages)	68
Table 33b.	Proportion of students having drunk (at least one glass) and having been drunk at the age of 13 or younger by gender. 2019 (percentages)	69
Table 34a.	Prevalence of drinking motive during the last 12 months: to enjoy a party. 2019 (percentages)	70
Table 34b.	Prevalence of drinking motive during the last 12 months: to enjoy a party by gender. 2019 (percentages)	71
Table 35a.	Prevalence of drinking motive during the last 12 months: anti-depressant. 2019 (percentages)	72
Table 35b.	Prevalence of drinking motive during the last 12 months: anti-depressant by gender. 2019 (percentages)	73
Table 36a.	Prevalence of drinking motive during the last 12 months: to cheer up. 2019 (percentages)	74
Table 36b.	Prevalence of drinking motive during the last 12 months: to cheer up by gender. 2019 (percentages)	75
Table 37a.	Prevalence of drinking motive during the last 12 months: like the feeling. 2019 (percentages)	76
Table 37b.	Prevalence of drinking motive during the last 12 months: like the feeling by gender. 2019 (percentages)	77
Table 38a.	Prevalence of drinking motive during the last 12 months: get high. 2019 (percentages)	78
Table 38b.	Prevalence of drinking motive during the last 12 months: get high by gender. 2019 (percentages)	79
Table 39a.	Prevalence of drinking motive during the last 12 months: enhance social gatherings. 2019 (percentages)	80
Table 39b.	Prevalence of drinking motive during the last 12 months: enhance social gatherings by gender. 2019 (percentages)	81
Table 40a.	Prevalence of drinking motive during the last 12 months: to fit in. 2019 (percentages)	82
Table 40b.	Prevalence of drinking motive during the last 12 months: to fit in by gender. 2019 (percentages)	83
Table 41a.	Prevalence of drinking motive during the last 12 months: improve parties. 2019 (percentages)	84
Table 41b.	Prevalence of drinking motive during the last 12 months: improve parties by gender. 2019 (percentages)	85
Table 42a.	Prevalence of drinking motive during the last 12 months: forget problems. 2019 (percentages)	86
Table 42b.	Prevalence of drinking motive during the last 12 months: forget problems by gender. 2019 (percentages)	87
Table 43a.	Prevalence of drinking motive during the last 12 months: it's fun. 2019 (percentages)	88
Table 43b.	Prevalence of drinking motive during the last 12 months: it's fun by gender. 2019 (percentages)	89
Table 44a.	Prevalence of drinking motive during the last 12 months: to be liked. 2019 (percentages)	90

Table 44b.	Prevalence of drinking motive during the last 12 months: to be liked by gender. 2019 (percentages)	91
Table 45a.	Prevalence of drinking motive during the last 12 months: to not feel left out. 2019 (percentages)	92
Table 45b.	Prevalence of drinking motive during the last 12 months: to not feel left out by gender. 2019 (percentages)	93
Illicit drugs		94
Table 46a.	Perceived availability of various illicit substances. Percentages responding 'fairly easy' or 'very easy' to obtain. 2019	94
Table 46b.	Perceived availability of various illicit substances by gender. Percentages responding 'fairly easy' or 'very easy' to obtain. 2019	95
Table 47a.	Frequency of lifetime use of illicit drugs. 2019 (percentages)	96
Table 47b.	Frequency of lifetime use of illicit drugs by gender. 2019 (percentages)	97
Cannabis		98
Table 48a.	Frequency of lifetime use of cannabis. 2019 (percentages)	98
Table 48b.	Frequency of lifetime use of cannabis by gender. 2019 (percentages)	99
Table 49a.	Frequency of use of cannabis during the last 12 months. 2019 (percentages)	100
Table 49b.	Frequency of use of cannabis during the last 12 months by gender. 2019 (percentages)	101
Table 50a.	Frequency of use of cannabis during the last 30 days. 2019 (percentages)	102
Table 50b.	Frequency of use of cannabis during the last 30 days by gender. 2019 (percentages)	103
Table 51a.	Frequency of lifetime use of cannabis mixed with tobacco. 2019 (percentages)	104
Table 51b.	Frequency of lifetime use of cannabis mixed with tobacco by gender. 2019 (percentages)	105
Table 52a.	Frequency of use of cannabis resin during the last 12 months. 2019 (percentages)	106
Table 52b.	Frequency of use of cannabis resin during the last 12 months by gender. 2019 (percentages)	107
Table 53a.	Frequency of use of weed/skunk during the last 12 months. 2019 (percentages)	108
Table 53b.	Frequency of use of weed/skunk during the last 12 months by gender. 2019 (percentages)	109
Table 54a.	Frequency of use of cannabis oil during the last 12 months. 2019 (percentages)	110
Table 54b.	Frequency of use of cannabis oil during the last 12 months by gender. 2019 (percentages)	111
Table 55.	CAST item 1: cannabis before midday. 2019 (percentages)	112
Table 56.	CAST item 2: cannabis alone. 2019 (percentages)	113
Table 57.	CAST item 3: cannabis memory problems. 2019 (percentages)	114
Table 58.	CAST item 4: cannabis recommended to quit by friends or family. 2019 (percentages)	115
Table 59.	CAST item 5: cannabis tried to quit. 2019 (percentages)	116
Table 60.	CAST item 6: cannabis problems, such as serious argument, fight, accident or problems at school. 2019 (percentages)	117
Table 61a.	CAST: sum of scores and high-risk users. 2019 (percentages)	118
Table 61b.	CAST: sum of scores and high-risk users. Boys. 2019 (percentages)	119
Table 61c.	CAST: sum of scores and high-risk users. Girls. 2019 (percentages)	120
Other illicit drugs		121
Table 62a.	Frequency of lifetime use of illicit drugs other than cannabis. 2019 (percentages)	121

Table 62b.	Frequency of lifetime use of illicit drugs other than cannabis by gender. 2019 (percentages)	122
Table 63a.	Lifetime use of various illicit drugs. 2019 (percentages)	123
Table 63b.	Lifetime use of various illicit drugs by gender. 2019 (percentages)	124
Table 63c.	Lifetime use of stimulants. 2019 (percentages)	125
Other substances		126
Table 64a.	Lifetime use of various substances, intravenous drug use and mixing alcohol with pills. 2019 (percentages)	126
Table 64b.	Lifetime use of various substances, intravenous drug use and mixing alcohol with pills by gender. 2019 (percentages)	127
Table 65a.	Frequency of lifetime use of inhalants. 2019 (percentages)	128
Table 65b.	Frequency of lifetime use of inhalants by gender. 2019 (percentages)	129
Table 66a.	Frequency of use of inhalants during the last 12 months and last 30 days. 2019 (percentages)	130
Table 66b.	Frequency of use of inhalants during the last 12 months and last 30 days by gender. 2019 (percentages)	131
Age of onset		132
Table 67a.	Age of onset for various substances and mixing alcohol with pills. Proportion answering at the age of 13 or younger. 2019 (percentages)	132
Table 67b.	Age of onset for various substances and mixing alcohol with pills. Proportion answering at the age of 13 or younger by gender. 2019 (percentages)	133
Abstinence		134
Table 68a.	Lifetime abstinence from various substances. 2019 (percentages)	134
Table 68b.	Lifetime abstinence from various substances by gender. 2019 (percentages)	135
New psychoactive substances (NPS)		136
Table 69a.	New psychoactive substances (NPS): frequency of lifetime use. 2019 (percentages)	136
Table 69b.	New psychoactive substances (NPS): frequency of lifetime use by gender. 2019 (percentages)	137
Table 69c.	New psychoactive substances (NPS): lifetime prevalence and proportion of other risk behaviours among users. 2019 (percentages)	138
Table 70a.	New psychoactive substances (NPS): frequency of use during the last 12 months. 2019 (percentages)	139
Table 70b.	New psychoactive substances (NPS): frequency of use during the last 12 months by gender. 2019 (percentages)	140
Table 71a.	New psychoactive substances (NPS): reported appearance among users. 2019 (percentages)	141
Table 71b.	New psychoactive substances (NPS): reported appearance among users by gender. 2019 (percentages)	142
Table 72.	New psychoactive substances (NPS): lifetime prevalence of the use of synthetic cannabinoids and synthetic cathinones. 2019 (percentages)	143
Perceived risk from use		144
Table 73a.	Perceived risk from use of various substances. Percentages answering 'great risk' that people harm themselves if they do any of the following. 2019	144

Table 73b.	Perceived risk from use of various substances. Percentages answering 'great risk' that people harm themselves if they do any of the following. Boys. 2019	145
Table 73c.	Perceived risk from use of various substances. Percentages answering 'great risk' that people harm themselves if they do any of the following. Girls. 2019	146
Social media		147
Table 74a.	Hours spent on social media during the last 7 days on a school day. 2019 (percentages)	147
Table 74b.	Hours spent on social media during the last 7 days on a school day by gender. 2019 (percentages)	148
Table 75a.	Hours spent on social media during the last 7 days on a non-school day. 2019 (percentages)	149
Table 75b.	Hours spent on social media during the last 7 days on a non-school day by gender. 2019 (percentages)	150
Table 76a.	I think I spend too much time on social media. 2019 (percentages)	151
Table 76b.	I think I spend too much time on social media by gender. 2019 (percentages)	152
Table 77a.	I get in a bad mood when I cannot spend time on social media. 2019 (percentages)	153
Table 77b.	I get in a bad mood when I cannot spend time on social media by gender. 2019 (percentages)	154

^(a) For the methodological remarks concerning the data collection by survey year, see Table 128.

^(b) Since 2007, it is clearly stated that alcopops should not be included in this category, but this was not the case between 1995 and 2003. A 2006 questionnaire test in eight countries showed significant result differences between the old and the recent versions. Hence, trend comparability is broken from 2007.

^(a) National examples are given so that a 'drink' is understood to contain roughly the same amount of pure alcohol as a glass of wine.

^(b) For the methodological remarks concerning the data collection by survey year, see Table 128.

^(c) In 1995-2003, the question referred to 'five or more drinks in a row' and neither cider nor alcopops were included among the examples. However, a 2006 questionnaire test in eight countries found no significant differences between this and the recent version.

Table 115. Proportion reporting having had five or more drinks ^(a) on one occasion, three times or more, during the last 30 days by gender. 1995-2019 ^(b) (percentages) ^(c)

^(a) For the methodological remarks concerning the data collection by survey year, see Table 128.

^(b) Since 2007, cannabis availability is measured separately, but in 1995-2003 it was combined with other substances. A 2006 questionnaire test in eight countries showed significant result differences between this and the recent version. Hence, trend comparability is broken from 2007.

^(a) '...(glue, etc.) in order to get high'. The definition of inhalant use was rephrased in the 2007 questionnaire. However, a questionnaire test in eight countries found no significant differences between the old and new versions. In 2011, countries were instructed to insert nationally relevant examples.

^(b) For the methodological remarks concerning the data collection by survey year, see Table 128.

(^a) Data collected online (web survey).

(^b) Data collected in the autumn of the previous year.

(^c) Data collected in 2008 instead of 2007.

(^d) Data collected in the autumn of the same year.

(^e) Data collected but not delivered.

(^f) Limited comparability.

(^g) Data collected with a mixed mode (paper and pencil and web based).

(^h) Data collected in 2018 instead of 2019.

(ⁱ) In Germany the study was performed: in 2003 in 6 federal states; in 2007 in 7 federal states; in 2011 in 5 federal states; in 2015 and 2019 in the Bavaria federal state only. For comparative reasons in the ESPAD Trend database the data related to Bavaria have been extracted to compute trends.

About this report

The 2019 ESPAD report presents the results from the seventh wave of data collection, conducted in 35 countries during the spring and autumn of 2019. It gives a comprehensive picture of the present situation among European young people as regards the use of cigarettes, alcohol, illicit drugs, inhalants, new psychoactive substances and pharmaceuticals, but also insights into gambling, social media use and gaming. This document contains a comprehensive overview of data presented in the form of tables.

About the EMCDDA

The European Monitoring Centre for Drugs and Drug Addiction (EMCDDA) is the central source and confirmed authority on drug-related issues in Europe. For 25 years, it has been collecting, analysing and disseminating scientifically sound information on drugs and drug addiction and their consequences, providing its audiences with an evidence-based picture of the drug phenomenon at European level.

The EMCDDA's publications are a prime source of information for a wide range of audiences including policymakers and their advisors; professionals and researchers working in the drugs field; and, more broadly, the media and general public. Based in Lisbon, the EMCDDA is one of the decentralised agencies of the European Union.

About ESPAD

The European School Survey Project on Alcohol and Other Drugs (ESPAD) is a collaborative effort of independent research teams in more than 40 European countries, making it the largest cross-national research project on adolescent substance use in the world.

ESPAD was founded in 1993, on the initiative of the Swedish Council for Information on Alcohol and Other Drugs (CAN) and with the support of the Pompidou Group at the Council of Europe. In later years, ESPAD has also established increasingly close cooperation with the EMCDDA, and at present the agency plays an important role in the coordination of the ESPAD project.

Most of the European continent is now covered by ESPAD, meaning that it provides a reliable overview of trends in substance use among 15- to 16-year-old European students. Data are collected every 4 years.
